

# ISOPHONE

## MAIN POCKET

- \*To safely receive your calls
- \*To receive a call or to call someone

### RECEPTION

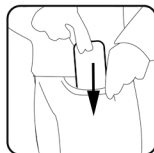

Open the case.

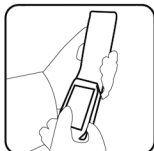

Put your cell phone in the main pocket, then shut the flap down.

The anti-radiation fabric efficiently protects you against the electromagnetic waves emitted by your cell phone.

### COMMUNICATION

Open the case flap, answer your call and shut the flap down.

Then you can have a safe phone call.

ISOPHONE provides perfect communication both for incoming and outgoing calls. Moreover, it allows you to have an extended use of your phone without submitting your brain to the cellular warming-up due to the harmful electromagnetic radiations.

## INSIDE POCKET

- \*If you want to test the efficiency of your ISOPHONE or if you don't want to be interrupted during meetings, conferences, appointments ...
- You don't have to switch off your cell phone !

### FULL INSULATION

Open the cell phone case, then the inside pocket and pull the fabric guide out of the inside pocket.

Push the phone into the full insulation pocket following the fabric guide.

Make sure you shut up the inside flap the right way to completely avoid any incoming waves.

Your cell will be automatically disconnected from the network and won't ring, and the incoming calls will be automatically forwarded to your voice messaging system. You don't need to switch your cell phone off and on to use it anymore. Whenever you need your phone, just take it out from the insulation pocket to be quickly reconnected to the network (up to 10 or 20 seconds depending on your cell version).

Just pull the guide to take the phone out from the full insulation pocket.

This case was made for those who want to take care of their health and well-being and protect themselves from the dangerous and harmful electromagnetic radiations.

### RECOMMENDATIONS :

- \*DO NOT WASH THE CELL PHONE CASE
- \*DO NOT CREASE OR CRUMPLE THE CELL PHONE CASE

The efficiency of our product has been proved and tests (test SJO524-1995) have shown that the fabric will protect you in 99% of cases if properly used.
